

Weibel CDS to be acquired by SHL Medical

Weibel CDS is excited to announce that it has entered into an agreement to be acquired by SHL Medical, a world-leading solutions provider of advance self-injection devices.

Headquartered in Zug, Switzerland, SHL Medical is a pioneer and technology frontrunner in the autoinjector industry. Its products enable effective and precise delivery of highly complex biological and biosimilar drugs to patients worldwide.

Weibel is a Swiss-based company and 2012 winner of the Startfeld Diamant Award. Weibel specializes in customer-funded research and development of affordable, innovative, and user-friendly injection systems and devices. Weibel's portfolio covers packaging technologies and delivery systems for parenteral drugs for home, point-of-care, and clinical use.

"We are excited to segue into one of the world's most prominent solutions providers of drug delivery systems. With SHL's experience and global outreach, Weibel will be able to accelerate our innovations for safer, easier, and faster drug delivery," said Weibel CEO Hans Peter Manser.

SHL Medical CEO Ulrich Faessler said: "SHL Medical's acquisition of Weibel is based on a shared passion for innovation and precision. We felt a synergy between Weibel's cutting-edge solutions and SHL's experience in commercializing original designs. The integration will strengthen our ability to offer even more advanced drug delivery systems based on human-centered designs and functionality. We look forward to a stronger future based on this shared vision to make self-injection easier for patients worldwide."

"SHL has always been simultaneously innovative and dependable, factors that have put us in the vanguard of the industry," said Ralph Howald, chief technology officer at SHL Medical. "The addition of Weibel's talent and range of solutions for high-volume injection will not only add depth to our technical portfolio, but also give us greater reach in the self-injection market."

With the acquisition, SHL is expected to expand its portfolio of innovative drug delivery solutions for injection devices.

About SHL Medical

SHL is a world-leading designer, developer, and manufacturer of advanced drug delivery devices such as autoinjectors, pen injectors, and inhaler systems. SHL Medical has locations in Taiwan, Switzerland, Sweden, and the US and develops breakthrough drug delivery solutions for pharma and biotech clients globally. SHL is also invested in developing connected products and digital services for the healthcare industry.

About Weibel CDS

Weibel CDS is a privately owned Swiss medical technology company that specializes in research and development of patch injection systems and devices for the delivery of parenteral drugs. The company offers solutions in filling, production, and customization of its device product lines.
